1.

Ans- Traditional programming follows fixed rules written by programmers, while AI learns from data and identifies patterns to make decisions.

In a digital doctor, traditional programming matches symptoms with predefined rules, whereas AI predicts diseases using previous medical data.

2.

Ans- 4 Vs of Big Data

1. Volume : Amount of data.
2. Velocity : Speed of data generation
3. Variety : Different types of data.

Example : (1) Data Warehouse : Store hotel booking flight records and AI uses permanent data and
